

URL Black List

The screenshot shows a dashboard for managing a URL Black List. At the top, there's a search bar and a notification icon. Below the header, there are four summary cards: 'TOTAL ENTRIES' (1), 'STANDARD LANGUAGE' (EN), 'TOTAL CHANGES' (1), and 'Last...'. The main content area is split into two panels. The left panel, titled 'New Black List URL', contains two input fields for 'URL' and 'Title', and a 'Save' button. The right panel, titled 'URL Black List', displays a table with columns for '#', 'Title', and 'URL'. The first row shows '1', 'Facebook Block', and 'https://www.facebook.com'. A '4' is placed over the 'Title' column header in the table.

1

Simple but great feature. You can add any sub page of your website where you don't want to show the live chat widget. Please note it will show anyway when a customer has open a active conversation.

3

All added URL's will be shown here.

2

The form to add a new URL for blocking the Live Chat on this page.

4

Edit and Delete the URL's as always by clicking on the "Title" or "Edit" button. Delete them by clicking on the "Red" button.
